## ABOUT THE SUMMIT

A well-functioning mobility system is essential for the economic health of the EU and the prosperity of its businesses and citizens. The challenges for EU mobility policy involve linking up different forms of transport ranging from air to rail, road and waterways. At the same time, the EU needs to make progress in decarbonizing transport so that it makes a contribution to tackling climate change while improving the quality of urban life.

POLITICO brings its 3rd annual Connected Mobility Summit to Amsterdam, Europe's mobility lab. The Summit will gather 130+ of the most impactful leaders in mobility to discuss the challenges and solutions for making the future of EU mobility work.
