

PROJECT CHALLENGE 4s

Dear partners,

It is a pleasure to welcome you to the 3rd Newsletter of the CHALLENGE4S project. As part of our Erasmus+ funded initiative, we are pleased to share with you the latest developments in our mission to transform the shipbuilding sector through Smart Skill Shift.

In this edition, we will highlight the following activities carried out so far:

- Consortium Meeting in Brussels:** Assessment of project progress and future strategies.
- Training Catalogue Prototype:** Design, format, and final content of the training catalogue.
- Valorisation Event Plan:** Planning with the main fairs, conferences, and events to promote the project objectives in the different participating countries.

1. CONSORTIUM MEETING IN BRUSSELS

CHALLENGE4S partners held a general project meeting at the SEA Europe offices in Brussels.

During the meeting, work was carried out on WP3 and WP4, where the foundations for the piloting of the training courses were laid. Furthermore, the links within the Shipbuilding Pact for Skills were strengthened.

2. TRAINING CATALOGUE PROTOTYPE

This prototype forms part of WP3: Prototyping, testing and implementation, led by EnAIP Friuli Venezia Giulia.

Within this WP, we have developed a Catalogue of Training and Upgrading Courses, which will be tested in the 4 countries participating in the project.

The courses are divided into 4 main areas:

- Green Transition
- Digital Transition
- Technical Area
- Transversal Area

The multilingual catalogue is available for download via QR codes in the five project languages:

QR IN SUOMI

QR IN ENGLISH

QR IN ITALIAN

QR IN PORTUGUESE

QR IN SPANISH

3. VALORISATION EVENT PLAN

We have planned the main conferences, fairs and events in order to promote the main objectives and make the project and its results known in the different participating countries.

[VALORISATION EVENT PLAN](#)

Thank you very much for being an essential part of this transformative journey.

Best Regards,
